- Competent authority: Danish Financial Supervisory Authority
- Date of production: 04 2021
- Company website: <http://polarisequity.dk/>

Please call +45 3526 3574 for further information.

Alert: You are about to purchase a product that is not simple and may be difficult to understand. You can find detailed information in the product's Private Placement Memorandum ("PPM") and Limited Partnership Agreement ("LPA"). We recommend you seek advice relating to legal, taxation or investment matters and to consult your own professional advisers concerning the acquisition, holding or disposal of the product.

What is this product?

- | | |
|---------------------------|--|
| Type: | Participation in a private equity fund. |
| Form: | A limited partnership fund (partnership interests). |
| Objectives: | The product provides a way for conducting an investment into private equity. The product will typically invest in equity or equity-like instruments in companies and hold these instruments for a number of years. |
| Intended retail investor: | Investors who are unable to meet the requirements to qualify as professional investors. Investors who will contribute less than EUR 5 million to the product. The product is intended to be offered to investors for whom such investment is only a small part of their entire diversified investment portfolio and who fully understand and are willing to assume the risks involved in the product and can bear the potential loss of their entire investment in the product. Each investor will be required to represent that he/she is familiar with and understands the terms, risks and merits of an investment in the product and that he/she is capable of evaluating the merits and risks of the product. |
| Term: | The product term is 10 years with 2 optional 1-year extensions. It may terminate earlier subject to certain extraordinary conditions set out in the LPA or be further extended. |

What are the risks and what could I get in return?

Risk indicator

An investment in the product involves a significant amount of risk, including the risk of losing the entire investment (and commitment), and should only be undertaken by prospective investors capable of evaluating and bearing such risk. There can be no assurance that the product's investment objectives will be achieved or that there will be any return of capital. Interested investors should read the PPM and LPA as a whole, conduct their own due diligence in a reasonable manner, and seek professional advice for – among other things – the legal and tax consequences of investing in the product. Interested investors should carefully consider all risk factors mentioned in the PPM before investing in the product. Investors can not withdraw from the product, unless in extraordinary circumstances and with consent, as set out in the LPA.

The risk indicator assumes you keep the product for 10 years until the end of the term. There may be extensions to the term. The actual risk can vary significantly if you want to cash in at an earlier stage and you may receive less than your original investment. There is no redemption mechanism and the product is not actively traded. This product is thus illiquid and you may not be able to sell your investment in the product or you may have to sell at a price that significantly impacts how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to reap a return on your investment.

We have classified this product as 6 out of 7, which is the second highest risk class. This product does not include any protection from future market performance, so you could lose some or all of your investment. This rates the potential losses from future performance at a high level. As a closed-ended private equity fund, the product is priced on a less than-monthly basis (it is not “priced” at all) and therefore the regulation prescribes that we give this product a market risk measure of 6 out of 7.

The unpredictable timing of cash flows poses funding risks to investors. Your investment in the product is contractually binding and defaulting on payments may result in a loss of the entire investment and/or possible liability for damages. In some circumstances you may be required to make further payments to pay for losses. **You may lose the total amount of your paid-in commitment to the product and pay in the amount up to your commitment.**

Performance scenarios

Investment of DKK 1,000,000 Scenarios		Year 1	Year 5	Year 10 (Recommended investment period)
Stress scenario	Return after costs	DKK 649,982	DKK 636,923	DKK 508,688
	Average return per year	-35.0%	-7.3%	-4.9%
Unfavourable scenario	Return after costs	DKK 960,691	DKK 1,161,079	DKK 1,661,530
	Average return per year	-3.9%	3.2%	6.6%
Moderate scenario	Return after costs	DKK 1,074,352	DKK 1,619,050	DKK 2,729,968
	Average return per year	7.4%	12.4%	17.3%
Favourable scenario	Return after costs	DKK 1,339,705	DKK 2,502,056	DKK 4,836,215
	Average return per year	34.0%	30.0%	38.4%

This table shows the calculated returns under different scenarios and holding periods assuming that capital calls are made at times and in amounts (with no cost or interest included) similar to the predecessor fund, Polaris Private Equity IV K/S. The figures are estimates and may change in the future. The tax rules of your home Member State may affect the amount actually paid out. **Interested investors should not understand the content of this document, the PPM and LPA as the giving of advice on legal, tax or investment matters.**

This product cannot be easily cashed in, as there is no redemption mechanism or public market. This means it is difficult to estimate how much you would get back if you cash in before the end of the recommended holding period. You will either be unable to cash in early or you will have to pay high costs or accept a large loss if you do so. The figures shown in the table include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor. The figures do also not take into account your personal tax situation, which may also affect how much you get back. Finally, the figures do not take into account any potential additional costs or losses in connection with early redemption.

What happens if the manager is unable to pay out?

The investor may face a financial loss up to the full amount of its investment owing to the failure of the manager or any investment or other counterparty to meet its obligations. The product may not meet its investment objectives or may not successfully implement its investment program. Full investment of the product may be delayed or not achieved at all. Investments will likely take several years to mature and, owing to the nature of the private equity industry and the investments, there will likely be years of limited or no performance before any profit is realised. Even successful investments may not produce significant cash flow to investors for some years. Some investments (or the portfolio companies beneath such investments) may experience financial difficulties and lose some or all of their value. General fluctuations in the market prices of securities may affect the value of investments, especially those (i) made in listed entities or which may become quoted subsequently; or (ii) with capital structures employing significant amounts of indebtedness. There is no compensation or guarantee scheme in place that applies to the product and, if you invest in the product, you should be prepared to assume the risk that you could lose all of your investment.

What are the costs?

Costs over time

The table below shows what impact the total costs incurred by the product will have on the investment return you might get. The amounts shown here are the cumulative costs of the product itself, for three different holding periods. The figures assume that capital calls are made at times and in amounts (with no cost or interest included) similar to the predecessor fund, Polaris Private Equity IV K/S. The tax rules that apply to the investor may affect the amount actually paid. The figures are estimates and may change in the future. These costs are paid by the product whereas the return that you may receive will depend on the underlying investments' performance.

Investment of DKK 1,000,000	If you cash in after 1 year	If you cash in after 5 years	If you cash in after 10 years
Total costs	DKK 6,500	DKK 32,500	DKK 65,000
Yearly Reduction in Yield	0.7%	0.7%	0.7%

Composition of costs

Costs consist of one-off costs, recurring costs and incidental costs and includes costs paid by you directly, but also indirect expenses paid by the product, which is not related to the making of investments. These vary and cannot be determined for certain at this time. The manager has estimated these in line with current market terms and past experience. The impact on the return per year of the costs charged by the product directly is detailed below. Further details on expenses are found in the LPA and PPM.

One-off costs	Entry costs	0.0%	The impact of the costs you pay when entering your investment.
	Exit costs	0.00%	The impact of the costs you pay when exiting your investment when the product is liquidated.
Ongoing costs	Portfolio transaction costs	0.00%	The impact of the costs of buying and selling underlying investments for the product.
	Other ongoing costs	0.65%	The impact of the costs each year for managing your investment, including fees paid to the manager but also expenses paid by the product for its operation, including accounting and depository fees.
Incidental costs	Performance fees	0.00%	The impact of the performance fee.
	Carried interest	0.00%	The impact of carried interests. We take these when the investment has performed better than 8%.

How long should I hold it and can I take money out early?

The product's term is expected to be 10 years with 2 optional 1-year extensions and may be extended further.

Recommended holding period: until the product's liquidation

Most, if not all, of the product's investments will be highly illiquid. There is no divestment or redemption procedure available. The product will repay capital - which results from the sale of investments made by the product - to investors over its life. You may not be able to sell your investment in the product or you may have to sell at a price that significantly impacts on how much you get back. There are restrictions on the transfer of interests in the product - details are found in the LPA.

How can I complain?

If you have any complaints about the product or about the conduct of the manager, you may lodge your complaint by writing an email to polaris@polarisequity.dk or by sending a letter to: Lene Møller Rønfeldt, Malmøgade 3, DK-2100 Copenhagen, Denmark. You can also contact us via our website: <http://polarisequity.dk/>. If you have any complaints about the person advising on, or selling, the product you should pursue that complaint with the relevant person in the first instance.

Other relevant information

Further documentation, including the manager's regulatory disclosures and disclaimers, is available on the manager's website at <http://polarisequity.dk/>. The cost, performance and risk calculations included in this KID follow the methodology prescribed by EU rules. You can find detailed information in the product's PPM and LPA.
