

LEAB Becomes Part of Micropower Group

Växjö, June 3rd, 2025 – Micropower Group, a global leader in industrial systems and products for batteries, battery charging, and power supplies, and a portfolio company of Polaris, is pleased to announce the acquisition of LEAB, a renowned mobile power solution provider for emergency, special, and commercial vehicles. This strategic move marks a significant milestone in Micropower's strategy, enhancing its presence in central Europe and its customer engagement capabilities.

The joining of LEAB will transform the existing commercial partnership, which has flourished over the last 25 years, into fully integrated operations. This will enrich the growth potential of both companies with new and attractive opportunities. With this stronger organization, customers will benefit from higher expertise, broader solutions portfolio, and closer engineering support to succeed in their electrification challenges.

Both Micropower and LEAB are entrepreneurial companies with a strong customer focus, bringing extensive application expertise in industry verticals such as special vehicles and onboard machinery. LEAB's in-depth product knowledge, honed over 25 years of working with and selling Micropower products, further strengthens this alliance. By leveraging the combined product portfolio, enhanced market presence, and complementary application expertise, this collaboration is set to drive significant growth.

About Micropower Group: Micropower is a global manufacturer of industrial systems and products for batteries, battery charging, and power supplies, with over 1.2 million units delivered yearly to customers and retailers worldwide. In 2024, Micropower achieved sales of 1,879 million SEK and employed 530 people. The company has a strong presence in key markets and strategic partnerships with battery manufacturers and distributors, ensuring a truly global sales presence. Micropower's main manufacturing hub is in Växjö, Sweden, with a second plant in Salo, Finland, and capabilities for assembly, customization, and logistics in Troy, US. The company is headquartered in Växjö, Sweden.

About LEAB: LEAB is based in the north of Germany and is active across Europe. The company develops and manufactures products as well as customized solutions for mobile power supplies in emergency, special, and commercial vehicles, supplying small to large customers quickly and reliably. LEAB's team is professional, flexible, and innovative, attaching great importance to care and quality in everything they do, from development and manufacture to application engineering, logistics and aftersales.
